

# Your Photos

Your best friend's wedding, a family reunion, or just a day in the life - your photos are precious and you want to keep them safe. And like any special moment, they're all the more valuable if they're shared.

## LOAD and STORE conveniently

Linksys by Cisco NMH405 has the memory card slots which make it so easy to transfer your files from your camera. Just plug in your memory card or device and upload your photos or videos to the Media Hub without having to turn on your PC.

Not only that, you will be able to transfer images directly to the Media Hub using camera with wireless transmitter. Now you know that your files are stored safely, you can focus on creating new memories.

\* On a wireless local network

## SHARE with family and friends

It's a digital photographer's dream. With Linksys by Cisco Media Hub, you don't just store your photos safely, you can upload and download media files all across the world\*. You and your loved ones can **easily view them anytime, anywhere with a PC or stream the photos to your TV through PS3 or XBOX360.\*\***

\* With Internet connection. Free remote access of media hub for 12 months. Service charges may apply subsequently.

\*\* Viewing media on a TV requires a UPnP-compatible digital media player
